DSA REGULATION
NO. 4200.3

9 Dec 74

MOBILIZATION RESERVE REQUIREMENTS FOR LUMBER AND ALLIED PRODUCTS (FEDERAL SUPPLY GROUP 55)

I. PURPOSE AND SCOPE. To provide procedural guidance for Military Services, hereinafter referred to as the Services, submissions of lumber and allied products (FSC Group 55) Mobilization Reserve Requirements. Due to the unique circumstances applicable to mobilization reserve requirements in this commodity area, separate procedures are necessary. This regulation applies to HQ DSA, Defense Construction Supply Center (DCSC), and the Services which elect to compute and communicate Mobilization Reserve Requirements for lumber and allied products. It has been coordinated with and concurred in by the Military Departments.

II. BACKGROUND. The DCSC, Directorate of Procurement and Production, performs as the Defense Supply Agency Commodity Manager and Procurement Agent for lumber and allied products. Items in these commodities are managed on a bulk basis with direct delivery from vendor to the requisitioning activity. Wholesale level stocks are not maintained for this commodity within the DSA depot system. In conjunction with this concept of operations, Mobilization Reserve Requirements for lumber and allied products will not result in pre-M-Day acquisition and stockage of materiel. The purpose of communicating these requirements is to provide data which depict volume and type. Consolidation of this requirements information from all submitting Services can then be reviewed for acquisition impacts or potential cost implications.

III. RESPONSIBILITIES

A. The Chief, Supply Management Division, Executive Directorate, Supply Operations, HQ DSA will maintain this regulation in a current status and review it annually.

B. The Commander, DCSC will receive initial submissions and changes to previous submissions of lumber and allied products mobilization reserve requirements from the Services. Based upon the cumulative effect of total Services submission by homogeneous item groupings, assess potential cost implication or quantitative acquisition impacts. Those items or groups of items which appear to pose a problem with industry, should immediate procurement be necessary in a mobilization situation, will be candidates for special industrial capability study. Alternatives in species, sizes, or grades will be considered by DCSC and appropriately proposed to the Services when such alternatives eliminate or decrease potential acquisition problems.

AFR 400-57

C. The Services which Elect to Compute Lumber and Allied Products Mobilization Reserve Requirements will submit them to DCSC for evaluation and assessment of potential impact on industry in the event immediate procurement should be necessary. Service submissions will be on listings or interpreted cards in the format specified in enclosure 1. Initial submissions will be submitted at the option of the Services and should be scheduled to arrive at the DCSC during the 6-month period prior to the beginning of each Fiscal Year. Modifications to initial submissions will be submitted based on agreement between the Services and DCSC.

IV. PROCEDURES. The format to be used in submitting requirements for lumber and allied products is provided in enclosure 1.
